

## Author Declarations

Please supply signed conformation containing the following declarations. This information is required for submission. Please note that failure to respond to these questions/statements will mean your submission will be returned to you. If you have nothing to declare in any of these categories then this should be stated.

- All named authors have seen and agreed to the submitted version of the paper; that all who are included in the acknowledgements section, or as providers of personal communications, have agreed to those inclusions; and that the material is original, unpublished and has not been submitted elsewhere.
- Any material which has been published elsewhere and is contained in a contribution to the Journal must be accompanied by a statement giving permission to reproduce the material signed by the author(s) and publishers concerned. When submitting material related to commercial products it may, in some circumstances, be appropriate for the author to forward a copy of the contribution to the manufacturers before publication. Any previous or pending publication of the material in conference proceedings, letters to journals and brief communications etc. must be declared. All Authors must declare whether there are any potential conflicts of interest and any sources of funding.
- Please state any conflict of interests. A conflict of interest exists when an author or the author's institution has financial or personal relationships with other people or organisations that inappropriately influence (bias) his or her actions. Financial relationships are easily identifiable, but conflicts can also occur because of personal relationships, academic competition, or intellectual passion. A conflict can be actual or potential, and full disclosure to The Editor is the safest course.
- Please state any sources of funding for your research
- If you are submitting a Randomized Controlled Trial, please state the International Standard Randomised Controlled Trial Number (ISRCTN). In addition reports of randomised trials must conform to revised CONSORT guidelines and should be submitted with their protocols (see Lancet 2005;**366**:107).
- Please state whether ethical approval was given, by whom and the relevant Judgement's reference number or letter. Studies on patients or volunteers require ethics committee approval and informed consent which should be documented in your paper. Patients have a right to privacy. Therefore indentifying information, including patients' images, names, initials or hospital numbers, should not be included in recordings, written descriptions or photographs, unless the information is essential for scientific purposes and you have obtained written informed consent for publication in print and electronic is made subject to any conditions. Written consents must be provided on request. If such consent has not been obtained, personal details of patients including in any part of the paper and in any supplementary materials (including illustrations) must be removed before submission.
